
Strategic Partnership Support Fund

The Strategic Partnership Support Fund (FSP) provides financial support for cooperation with strategic partners, which should bring above-standard outputs based on clear added value, measurable benefits, the development of synergies, and long-term sustainability.

Supported activities include the preparation of international projects, team development, joint research and educational initiatives, academic stays, conferences, and online activities, as well as the continuation of projects building on already achieved results.

The call for proposals for the Strategic Partnership Support Fund is currently being revised.

We will provide timely information about the conditions and deadline for the 2026 call for proposals.
